

The ProGreen Story, Since 1987

ProGreen® International, Inc. was started in Denver, CO in 1987 by Steve Walker. **ProGreen** still has its headquarters in Denver and it remains a family run business. **ProGreen** is the longest singly-owned artificial turf company in the industry and has the largest network of dealers in the world.

ProGreen Grass is represented by dealers in North America, South America, Europe and Asia.

Steve Walker started **ProGreen** as an artificial putting green company over twenty years ago. As we perfected the artificial putting green system we applied the technology learned to synthetic grass for landscaping, dog runs, playgrounds, and sports fields. **ProGreen** has invented many of the technological advances in production and installation techniques that the industry takes for granted today. **ProGreen** has completely revolutionized the synthetic grass industry with our one-of-a-kind golf cup support system, variety of seaming materials, installation methods, and types of bases that we use. Additionally, we offer the best primary and secondary backings available and we guarantee the lowest prices.

ProGreen is constantly developing and improving its synthetic turf system. We build all our products to our own personal specifications based on our years of research, development and experience. No short cuts in material or workmanship are ever taken to cheapen the price and make you think you are getting a "deal". **ProGreen** utilizes the most advanced yarn extrusion and tufting machines in the world. This, coupled with only the highest quality components that are put together with painstaking precision to give you the most reliable, high performance, longest lasting turf available!

What sets **ProGreen** apart from other synthetic turf companies is the superior quality of our products, our devoted staff, our global distribution network, and our 20 plus years of hands-on experience. If you have any questions before or after purchasing **ProGreen Grass** feel free to contact a **ProGreen** Specialist at (888) 440-7888.

ProGreen is a proud member of GreenScapes and the Pet Care Services Association
